

GENESIS T. CLABISELLAS

Software Engineer

Sembawang, Singapore | +65 8012 3681 | clabisellasg@gmail.com | github.com/clabisellasg | clabisellas-dev.vercel.app

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL

Backend / APIs / Security: Spring Boot, Spring Security, Node.js, Express.js, REST APIs, JWT, Argon2, role-based access control

Frontend / Mobile: React, Next.js, Vite, Tailwind CSS, Android, Retrofit, Gson

Databases / Data / Tools: MySQL, PostgreSQL, MongoDB Atlas, Metabase, Power BI, Excel, Git, GitHub, Postman, VS Code, AWS Cloud Fundamentals

AI-Assisted Development: OpenAI Codex, ChatGPT, AI-assisted coding, AI-assisted debugging

PROJECTS

NASAM - Non-Academic Scholar Application Management System | *Capstone Project; Next.js, React, TypeScript, Express.js, MongoDB, JWT, Argon2, RBAC*

- Collaborated in a five-developer team to digitize scholarship application workflows for Cebu Institute of Technology - University.
- Built role-based full-stack features for applicants, OAS staff, department heads, and administrators.
- Delivered application tracking, document uploads, interview scheduling, notifications, audit logs, and analytics dashboards.
- Secured protected API routes with JWT, Argon2 password hashing, CORS, Helmet, cookies/sessions, and permission middleware.

ApplyWise AI - Full-Stack AI Job Application Platform | *Java, Spring Boot, React, TypeScript, PostgreSQL, NVIDIA API, Docker; Ongoing Personal Project - Functional MVP*

- Built a job application platform for saving resumes and job postings, generating AI-powered compatibility analyses, and tracking application progress.
- Integrated NVIDIA Nemotron to identify matching and missing skills and generate cover letters grounded in the user's resume.
- Secured user data with Spring Security, Google OAuth, Argon2 password hashing, server-side sessions, CSRF protection, and user-scoped REST APIs.

Pawfect Match - Full-Stack Pet Matchmaking Platform | *Spring Boot, Spring Security, MongoDB, React/Vite, Android, Retrofit, Gson, JWT*

- Implemented REST APIs for registration, login, pet profile CRUD, ownership-protected flows, and pet photo upload/retrieval.
- Added authorization checks through Spring Security context and integrated authenticated Android API calls using Retrofit and Gson.

PlatePal Meal Planner - Full-Stack Meal Planning Application | *Spring Boot, MySQL, React/Vite, Spring Security, JWT*

- Built backend modules for recipes, meal plans, shopping lists, favorites, ratings, users, and admin workflows.
- Implemented JWT authentication, profile endpoints, recipe image uploads, recipe filters, and meal-plan management APIs.

PROFESSIONAL EXPERIENCE

Veritacore Philippines Inc. | Data Analyst Intern | Cebu, Philippines

Jan 2026 - Apr 2026

- Built interactive Metabase dashboards to visualize monthly company data and improve visibility into key business metrics.
- Queried and analyzed company data using MySQL to identify business trends, patterns, and performance insights.
- Collaborated with team members to translate raw data into actionable insights for reporting and operational decision-making.
- Applied data validation, documentation, and reporting practices relevant to database-backed applications and business logic.

EDUCATION

Cebu Institute of Technology - University

May 2026

Bachelor of Science in Information Technology | Cebu City, Philippines

Relevant Coursework: Data Structures & Algorithms, Programming Languages, Networking, Mobile and Web Development, Object-Oriented Programming, Information Assurance and Security, Information Management, Application Development and Emerging Technologies, Systems Integration and Architecture

CERTIFICATIONS

AWS Cloud Foundations | AWS Cloud Architecture
